

Table 3B: Patients by Hispanic or Latino Ethnicity, Race and Language

Purpose: Table 3B identifies characteristics of patients including race, Hispanic/Latino ethnicity, and language.

Changes to 2011 Report: Table name changed from “Patients by Hispanic or Latino Identity, Race and Language” to “Hispanic or Latino Ethnicity, Race and Language.”

Key Terms:

- **TOTAL PATIENTS:** Individuals who have one or more UDS visits *during the reporting year.*
- **GRANT PROGRAM PATIENTS:** Individuals who have one or more reportable UDS visits supported by one of the special population grant programs (HCH, MH, PH).
- **HISPANIC/ LATINO ETHNICITY:** Includes all persons who identify with the Spanish speaking nations of the world (e.g., Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin; excludes Haiti, Portugal, Brazil).

How Data are Used:

- **Patient profile:** Describes the patients by race and ethnicity and is used to better understand disparities.
- **Language:** Identifies a critical barrier to accessing care. Language other than English can include spoken languages as well as sign language.

Table Tips:

- Table 3B is completed for the “universal” report and for grant specific reports.
- Count each patient only once on Table 3B regardless of *volume* (the number of times he received services) or *scope* (the number of types of services received).
- Use Table 3B line 7 as follows: Patients who report
 - race but no Hispanic/Latino ethnicity data – report on column a
 - Hispanic/Latino ethnicity data but no race – report on column b
 - neither race and Hispanic/Latino ethnicity data – report on column C. (*Shown on back*)

RACE:

- Race is self-selected. If no race is reported by patient, use line 7 (Unreported/Refused to report). (*Shown on back*)
- BPHC presumes that patients are able to select multiple races. Patients who do should be included on line 6.
- The total patients on line 8 should equal the total number of patients reported on Table 3A (line 39 cols A and B.)

HISPANIC/LATINO ETHNICITY:

- Hispanic/Latino ethnicity is self-reported by patients.
- If patient does not indicate Hispanic/Latino ethnicity they are to be counted as non-Hispanic/Latino in column B. (*Shown on back*)
- For Hispanic/Latino patients who do not select a race, report these Hispanic/Latino patients on line 7, column A, as “unreported” race/Hispanic or Latino ethnicity. (*Shown on back*)

PATIENTS BY LANGUAGE:

- Patients best served in a language other than English includes persons who 1) are not fluent in medical English, 2) are served by a bilingual provider, 3) receive interpretation services, 4) use sign language, 5) live where a language other than English is used.
- This is the only UDS cell that may be estimated.

Table 3B: Patients by Hispanic or Latino Ethnicity, Race and Language

Cross Table Considerations:

- Tables 3A, 3B, and 4 and Patients by Zip Code describe the same patients and the total patients reported must be equal. (Shown on Table 3A)
- If you submit grant tables, the total number of patients reported on the grant table must be less than or equal to the corresponding number on the universal table for each cell. In other words, you cannot report more homeless patients who are white than total patients who are white.
- Tables 3B and 7 both report patients by race and Hispanic/Latino ethnicity. It is important that the data sources for identifying race and ethnicity for the two tables are the same. For example, you cannot report more Asian patients with hypertension on Table 7 than total Asian patients on 3B.

Table 3B: Patients By Hispanic or Latino Identity / Race / Language - Universal

Patients by Race	Patients by Hispanic or Latino Identity		
	Hispanic/Latino (a)	Non Hispanic/Latino (b)	Unreported/Refused to Report (c)
Number of Patients			
1. Asian	10	586	
2a. Native Hawaiian	11	81	
2b. Other Pacific Islander	11	615	
2. Total Hawaiian/Pacific Islander (Sum lines 2a+2b)	22	696	
3. Black/African American	132	1,076	
4. American Indian/Alaska native	12	376	
5. White	337	27,364	
6. More than one race	54	110	
7. Unreported/Refused to report	38,375	1,139	3,996
8 Total Patients(Sum lines 1+2+3 to 7)	38,942	31,347	3,996

Table Tips

Demonstrated:

If patient does not indicate they are Hispanic/Latino assume they are not and report in column b.

Patients who lack both race and Latino ethnicity data are reported on line 7, column c.

Report Hispanic/Latino patients who do not report a race on line 7, column a.

Table 3B: Patients By Hispanic or Latino Identity / Race / Language - Universal

Patients by Race	Hispanic/Latino (a)	Non Hispanic/Latino (b)
Number of Patients		
1. Asian	10	586
2a. Native Hawaiian	11	81
2b. Other Pacific Islander	11	615
2. Total Hawaiian/Pacific Islander (Sum lines 2a+2b)	22	696
3. Black/African American	132	1,076

	Asian (a)	Native Hawaiian (b1)	Pacific Islander (b2)	Black/African American (c)
Section B: Hypertension by Race and Hispanic/Latino				
Patients 17 to 85 diagnosed with hypertension whose last blood pressure was taken within 12 months				
Hispanic/Latino				
6. Total hypertensive patients	2	1	-	9
7. Charts sampled or EHR total	-	-	-	-
8. Patients with HTN controlled	-	-	-	-
Section B: Hypertension by Race and Hispanic/Latino				
Patients 17 to 85 diagnosed with hypertension whose last blood pressure was taken within 12 months				
Non-Hispanic/Latino				
6. Total hypertensive patients	61	9	137	176
7. Charts sampled or EHR total	1	-	1	2
8. Patients with HTN controlled	-	-	1	1

Table 3B Relationship to 7: Table 7 patients by race and Hispanic or Latino ethnicity **cannot** exceed patients in the same categories on Table 3B.
